

COAX cables RG6 and RG59 utilize many different fittings to terminate cables. Jonard offers compression tools to work with all types of connectors (BNC, PPC, Belden, and more).

**CT-200** - Universal Compression Tool designed for use on most F connectors (RG59, RG6, & RG11), BCN connectors (RG59, RG6) and RCA connectors (RG59 & RG6).

**CTF-200** - Compression tool with a fixed design for use on the longer style F connectors (such as PPC® EXLWS Aquatight connector, EX-XL and other similar length connectors)

**CTF-200CG** - Compression tool with a fixed design for use on Corning Gilbert connectors. Tool also works with brands such as PPC & Thomas Betts.

**CTF-230** - This dual compression tool is two tools in one, combining the features of the CTF-200 and the CTF-300. It is designed for use on either short or long F connectors (such as PPC EX6 and PPC EX6XL), and also works on most RG 11 connectors. The Green ring side of the plunger is for the “short” PPC EX6 style.

**CTF-300** - Compression tool with a fixed design for use on the shorter style F connectors (such as PPC Aquatight Connector EX or shorter connectors and other similar length connectors)
